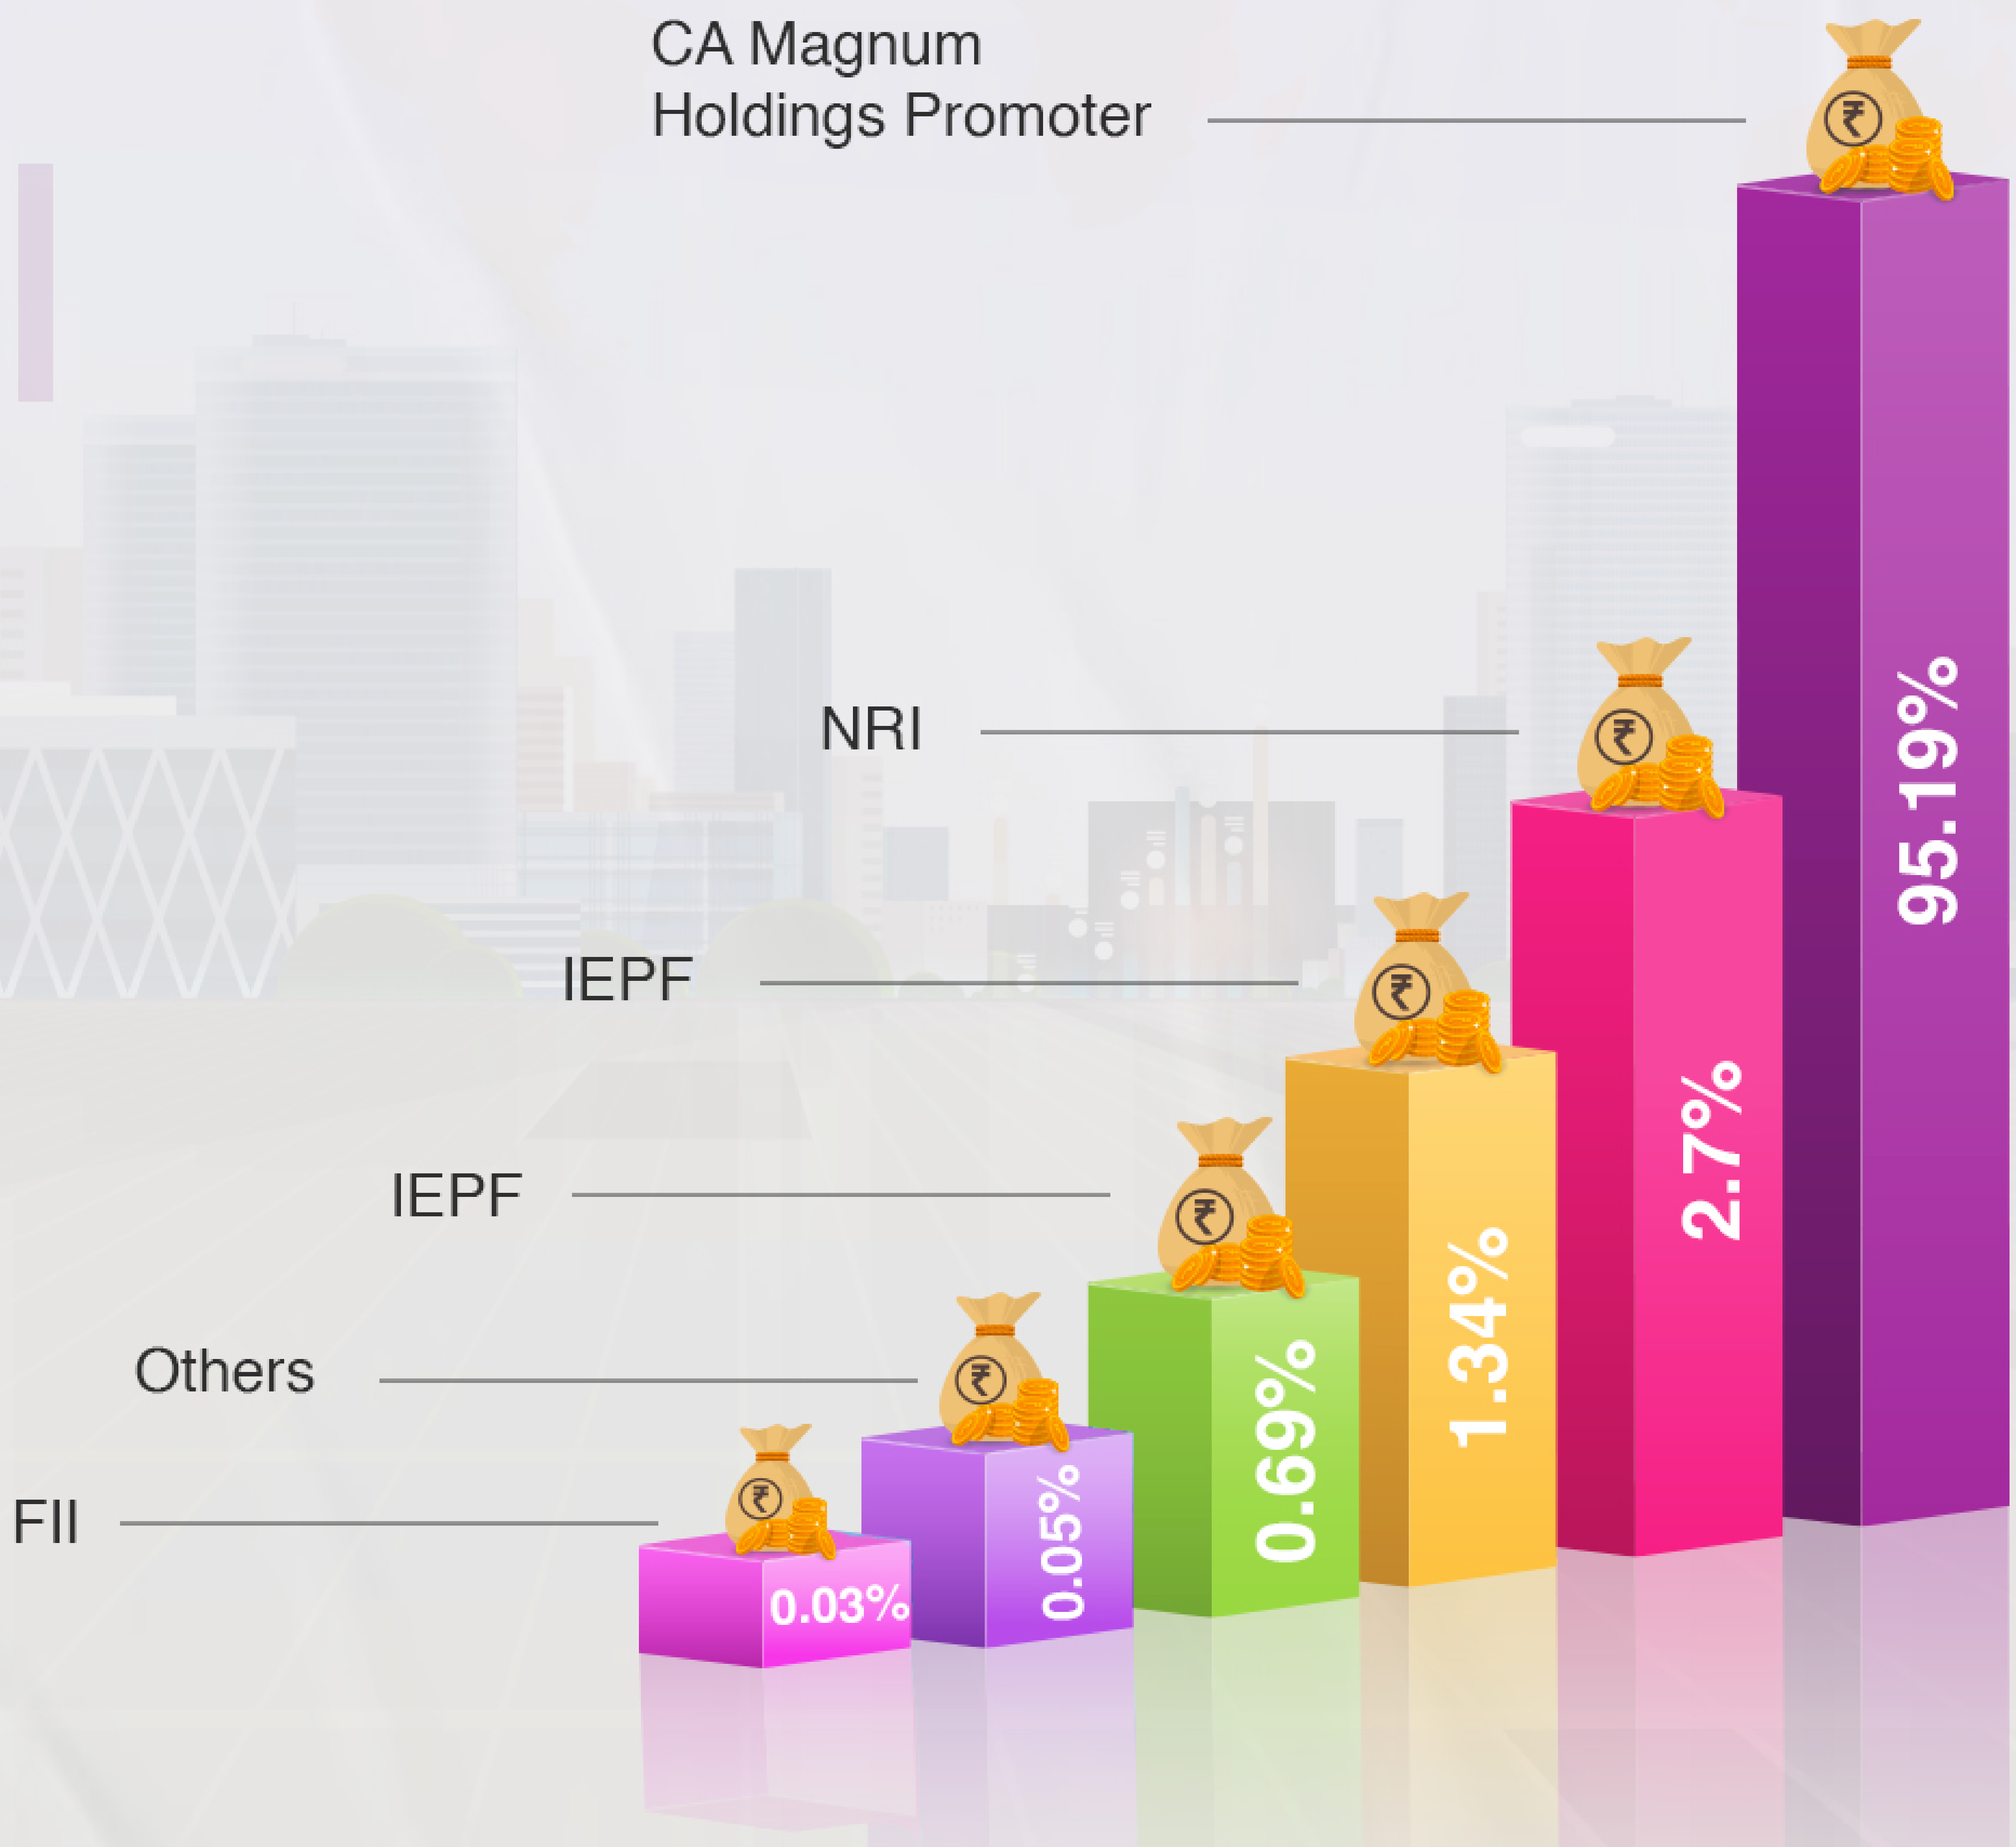
SHAREHOLDING Pattern



HEXAWARE TECHNOLOGIES

IPO DETAILS

Hexaware Technologies' ₹9,950 crore IPO is entirely an offer for sale by CA Magnum Holdings, meaning the proceeds will go to the promoter rather than the company itself. As per the DRHP, the primary goal is to list its shares on exchanges, offering an exit for existing shareholders.

If successful, this IPO will surpass TCS's ₹4,700 crore offering, becoming India's largest in the IT services sector. The listing aims to boost Hexaware's market visibility, provide liquidity to its **current shareholders,** and help access capital markets for future growth.
